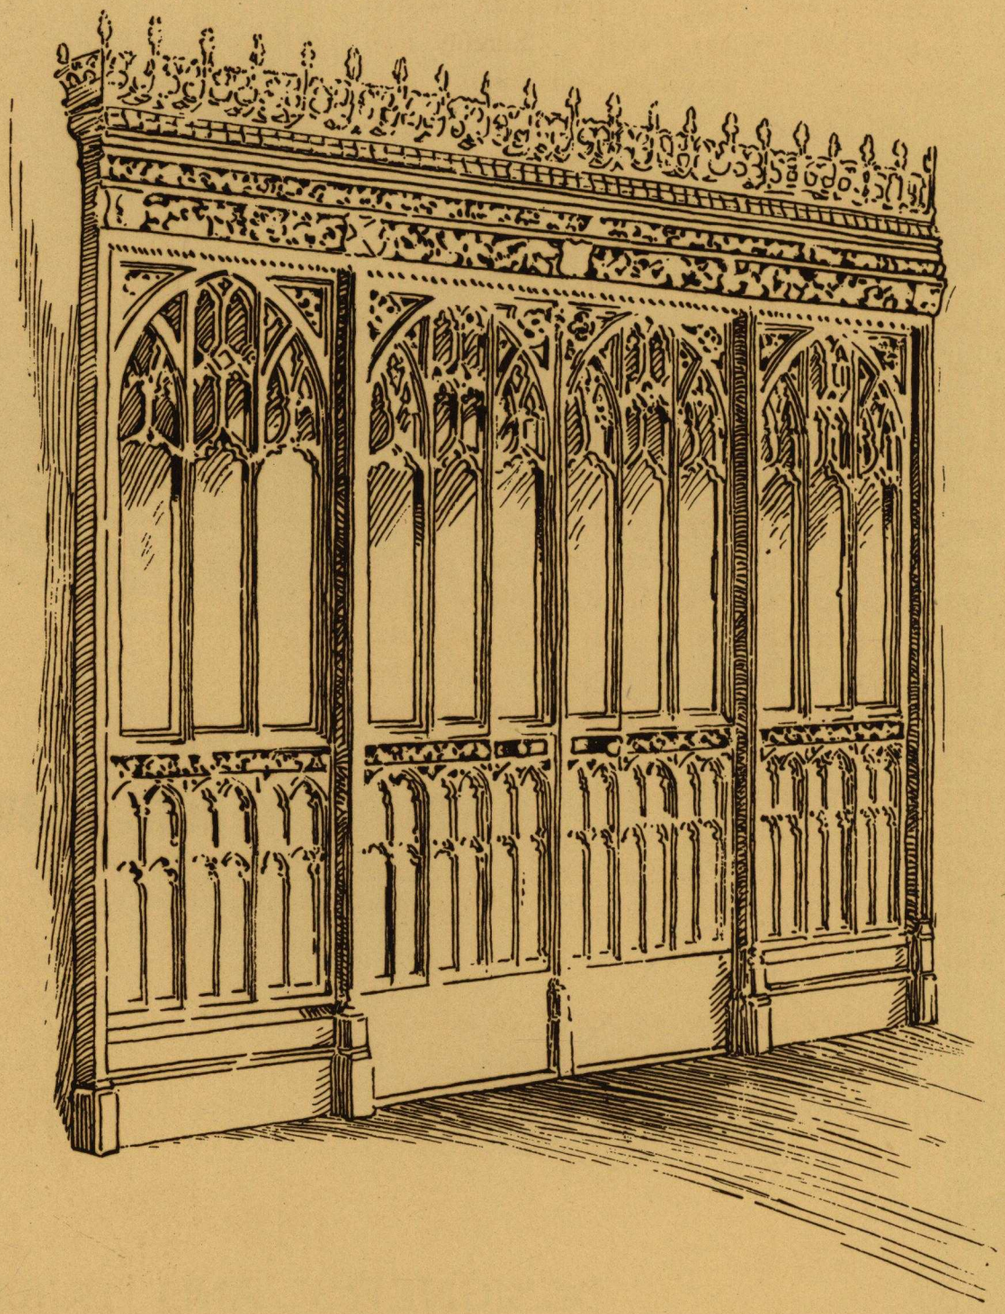
ESTABLISHED IN 1875

DESIGNERS AND BUILDERS OF ECCLESIASTICAL FURNITURE



IF you are interested in the problem of Church furniture we hope this brochure will be of some assistance to you. The interiors shown herein are a few of the thousands which we have furnished and we believe will give you a fair idea of what Church architects are trying to accomplish, which is to design a Church that is Churchly and impressive, not simply an auditorium.

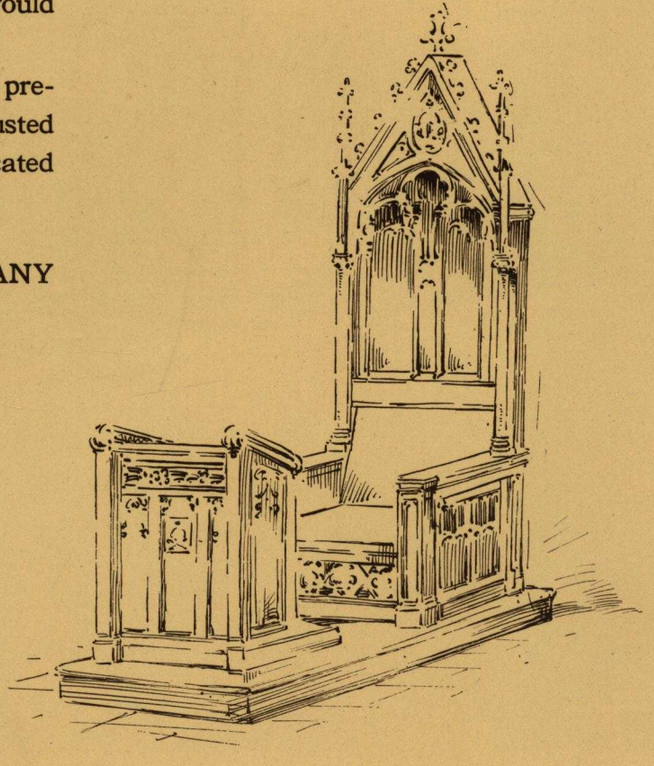
In the furnishing of a Church the pew ends and other furnishings are relied upon to carry out the architectural style of the Church and furnish in their attractiveness of designs, the artistic effect which is desired.

Where your Architect has furnished designs we prefer to figure on them, but if you do not have special designs, and you will furnish us with information as to the style of architecture of your Church, we will be pleased to submit designs, which will be correct architecturally, of any article of Church furniture made in wood.

We have one of the largest cabinet shops in the Country and as we cut our own lumber from the log we are able to make work with the fewest possible joints. We are prepared to furnish pew backs with only one joint in the back, either in quartered or plain sawed oak, birch or mahogany. Both of these boards would be cut from the same log, side by side, so that the back would have a perfect match of grain and shade.

We employ over 2500 wood-workers and are prepared to faithfully execute any commission that is entrusted to us, no matter how elaborately carved or complicated the design may be.

THE THEODOR KUNDTZ COMPANY
CLEVELAND, OHIO



ALL works of taste must bear a price in proportion to the skill, time, expense, and risk attending their invention and manufacture. Those things called dear are, when justly estimated, the cheapest. They are attended with much less profit to the artist than those which everybody calls cheap. ¶ Beautiful forms and compositions are not made by chance, nor can they ever, in any material, be made at small expense. A composition for cheapness and not for excellence of workmanship is the most frequent and certain cause of the decay and destruction of arts and manufactures. —JOHN RUSKIN
